Sava
Swivel Chair

With the addition of a simplified control, black paint finish, and fixed-height T-arm, SAVA has entered a new dimension. More accessible, less formal, more versatile, SAVA now goes more places, revealing an elegant presence wherever it is found. Even though there are more looks than before, the comfort remains the same, based on the dynamic principles and support of the original Balanced Tilt mechanism.

Designer: Sava Cvek

The relationship between Sava Cvek and Stylex began more than a decade ago and has culminated in many highly successful, innovative products. Taken together, the various series of Sava seating express the mature understanding that has developed between Stylex and Cvek through many years of enthusiastic collaboration.
